Why Choose a Fee-Only Financial Firm?

Fee-Only financial planners are different from most advisors because they are paid directly by their clients. This unique independent status allows them to remain direct and unbiased in their advice.

Other firms may have the ability to charge clients a fee for acting as their adviser while also receiving commissions on the products they sell to their clients. In our opinion, this creates the potential for corrupted motivation of the advisor, because the adviser has an incentive to sell products in the best interest of their firm, not their client.

At Zinifex Limited, LLC, we receive no benefit from brokerage firms, commissions, finder's fees, or products of any kind. This allows us to focus strictly on developing and implementing disciplined investment and financial planning strategies for you, without interference by any conflicting self-interests.

Our Process

We understand that today's consumers have access to endless resources for obtaining financial advice- the internet, magazines, investment clubs, talk shows and word-of-mouth. Knowing what information is relevant, how to analyze it, and how to turn it into wise financial decisions, however, requires more than occasional research and generalized guidance.

At Zinifex Limited, LLC, we take a comprehensive approach to financial planning, providing an array of customized financial services to each client. With our process, clients benefit from coordinated investments and strategic financial planning.

To establish a long-term, mutually rewarding relationship with our clients, we adhere to the following process for pinpointing the best possible financial solutions:

Establishing the Relationship

Our client relationships typically begin with phone calls and in-person meetings. During this time we learn about your needs and make sure you thoroughly understand what we can offer you. We will make a commitment only when we agree that the relationship can be mutually beneficial.

Gathering Necessary Information

We will gather the information from you needed to better understand your specific needs and objectives through meetings, discussions, and our investment policy questionnaire.

Integration of Key Wealth Management Elements

We will review general financial issues, such as cash-flow needs, tax situation, retirement planning, estate planning, and other considerations specific to your situation. This will ensure that our investment strategy meets all of your personal financial goals.

Development of Your Investment Strategy

Together we will develop an appropriate investment strategy for your portfolio. This will include an asset allocation based on our understanding of your risk tolerance, time horizon, and tax situation. We will continually evaluate the appropriateness of this strategy as your situation evolves.

Portfolio Transition Strategy

We will transition your current holdings into our new strategy through a mutually agreed upon process, while minimizing any tax ramifications. We will help you to consolidate your current investment accounts, coordinate asset transfers, and monitor the movement process to ensure everything takes place as agreed upon.

Portfolio Implementation and Ongoing Management

Once your assets have been consolidated and relocated, we will monitor and adjust your portfolio as needed using our discretionary authority. Any changes will be based on our manager's due diligence and tactical asset allocation decisions.

Portfolio Reporting and Reviews

You will receive a monthly statement from your custodian for each of your accounts. Additionally, you will receive a quarterly statement from us depicting your portfolio's holdings and performance versus various asset class benchmarks. You will also receive our quarterly newsletter at that time which discusses market reviews written by the principal of our firm and informative concept pieces. We are always available to meet with our clients to review their portfolio and answer any questions that may arise.
